

FREE CISCO Training Certified Support Technician (Cybersecurity)

BDI Bridge Academy is a 20-week IT program in Atlanta designed for individuals with disabilities ages 18 and up.

About Bridge Academy

Looking to boost your cybersecurity skills? The Cisco Certified Support Technician (CCST) Cybersecurity certification is your way to mastering entry-level cybersecurity concepts and topics. From security principles to network and endpoint security, vulnerability assessment to risk management, and incident handling, this certification covers it all.

The program is FREE for all accepted applicants!

High School Diploma/GED and verifiable disability required.

"My son, Mason, was stuck in a series of dead-end food industry jobs that weren't utilizing his talents. We weren't sure how to go about getting him into a program where he would thrive and succeed. BDI Bridge Academy changed that. The whole time, he expressed nothing but support for all the teachers and staff here. We never thought this would be possible; now he has a future. We are so excited about what lies ahead, and I am forever thankful!"

- Marcy Rende, parent

The Program Includes

Cisco Certification Preparedness

Work Readiness Training

Employment Support

Take the first step to building a bridge to your future!
